CAREER OBJECTIVE

Software Developer and Data Analyst with hands-on experience in backend development, database management, and data analysis. Skilled in building web applications, developing REST APIs, working with relational databases, and analyzing business data. Seeking a Software Development Engineer role to build scalable applications and contribute to impactful software solutions.

TECHNICAL SKILLS

Programming Languages: C++, C, JavaScript (Basics), PHP, Python (Basics)

Web Technologies: HTML, CSS, JavaScript, PHP

Backend: PHP, Laravel, REST APIs

Databases: PostgreSQL, MySQL, SQL

Data Analysis: SQL, Tableau, Redash

Tools: Git, GitHub, VS Code, XAMPP, MySQL Workbench

CS Fundamentals: OOPs, DBMS, Operating Systems, Data Structures & Algorithms

EXPERIENCE

Nivasa Finance, Bengaluru — *Software Developer & Data Analyst Intern* (May 2026 – Present)

- Worked on backend development using **PHP** and **PostgreSQL** for the Navigator Platform.
- Contributed to the development and enhancement of the **Navigator Platform** as part of the software development team.
- Worked on REST APIs, backend logic, database operations, and application workflows.
- Used **PostgreSQL** for database querying, data management, and application-level operations.
- Performed data analysis and reporting using **SQL, Redash, and Tableau**.
- Worked on CRM workflows, customer processes, dashboards, and business process improvements.

PROJECTS

ShopCalm — E-Commerce Platform

- Developed an e-commerce platform with product, category, brand, user, and order management functionalities.
- Implemented role-based access control and administrative workflows for product and platform management.
- Developed backend functionality using **Laravel and PHP with MySQL** for database management.
- Designed responsive user interfaces using **Bootstrap, HTML, CSS, and JavaScript**.
- **Tech Stack:** Laravel, PHP, MySQL, Bootstrap, HTML, CSS, JavaScript

CineBook — Online Movie Ticket Booking System

- Developed a full-stack web application for browsing movies and booking movie tickets.
- Implemented user authentication, movie browsing, theatre and showtime management, seat selection, and booking history.
- Developed server-side application logic using **PHP** and managed application data using **MySQL**.
- Built responsive and interactive web pages using **HTML, CSS, and JavaScript**.
- **Tech Stack:** HTML, CSS, JavaScript, PHP, MySQL

College Prediction System — Machine Learning Project

- Developed a machine learning-based web application to predict suitable colleges based on student rank, category, and preferences.
 - Implemented a **Random Forest** model using real-world datasets for college prediction.
 - Performed data preprocessing and analysis using **Python, Pandas, and Scikit-learn**.
 - Built a lightweight web interface using **Flask, HTML, and CSS** for user input and result visualization.
 - **Tech Stack:** Python, Flask, Scikit-learn, Pandas, HTML, CSS
-

EDUCATION

B.Tech in Information Science and Engineering (2022 – 2026)
University Visvesvaraya College of Engineering (UVCE), Bengaluru | **CGPA: 8.6 / 10**
Class 12 (Varadadri PU College) — 2022 | **96.00%**
Class 10 (Adarsha Vidyalaya) — 2020 | **96.64%**

HOBBIES

Playing Cricket • Watching Movies
